MESSAGE FROM THE GOVERNOR. The following message was received from

"I return, without my approval, House hill No. 217, an act in relation to the Deaf, Dunsb, and Blind Institute, at Staunton, Va., for reasons similar to those which induced me to withhold my signature from House bills Nos. 213 and 216, in relation to lunatic asylume. I know of nothing in the present conduct of the institute which calls for a change in the administration, nor do I know of any reason why the present mode of appointment should be siltered.

Another brilliant audience greeted Remenyi and his concert company at Mozart Hall last night. It is useless to multiply words in saying that the great violinist delighted his hearers by his performance on his instrument. Their pleasure was manifested by frequent and hearty applianse and numerous recalls. Another pleasing feature of the evening was Professor Luckstone's splendid piano-playing, while Miss Wallace and Mr. De Celle sang several selections with fine effect. So far as I am informed the management is discient honest, and economical, the methods of a natruction good, and the condition of the institution prosperous. In 1883 I chaared the Board at the administration because complaints were ade, and would be entirely willing to do so again ould any justifiable causes arise. There is no seen assigned why the power of appointment ould be transferred from the Governor to the ard of Public Works, and I am constrained to approve the bill.

The bill provides that locomotive whistles must be blown when the locomotive gets within 500 yards of any crossing, and makes it a mission of a railroad track except to go from one portion of a farm on which a person resides or is employed to another portion of such farm. The penalty is a fine of not less than \$1 and more than \$5.

Most of our readers have thought very little of the fact that in the exudation they see clinging to the fact that in the exudation they see clinging to the sweet-gum tree in the hot summer months there is a principle that is considered the most powerful stimulating expectorant known. They have no doubt thought less of the fact that in the mullein-plant seen in the old-fields is a muellarinous substance that acts as a soothing demuleent on the inflamed surfaces of the lungs, and which has attracted the attention of the medical world in consequence of its wonderful effects on consumption. When these things are considered it is not surprising that "Taylor's Cherokee Remedy of Sweet Gum and Mullein," the great panacea for Coughs, Croup, Whooping-Cough, and all Brenchial Affections, is proving such a boon to those suffering.
